

Introduction VALBART Rising Stem Ball Valves

February 2010

VALBART Srl, Italy informs that it has entered the production of Rising Stem Ball Valves (RSBV).

This type of Non Contact Metal Seated Ball Valves is widely used in the Gas Dehydration and Regeneration processes such as in Molecular Sieve and Isomerisation Installations. The Rising Stem Ball Valves are an excellent addition to the existing range of the VALBART Trunnion Mounted API 6D & 6A Ball Valves.

VALBART, in its quest of a continuous improvement of its products portfolio to serve better the various needs its customers may have, has appointed experienced employees with more than 20 years of know how in engineering and sales of RSBV, to develop and help manufacturing the VALBART Rising Stem Ball Valves.

The production ranges from sizes 1" to 24" and ratings from 150# to 2500# and the valves design counts various advantages for our customers, such as:

- Non Rotating Stem - only linear movement for high performance gland sealing and excellent applicability for actuation and frequent cycling;
- Heavy Valve wall thickness to API 6D as a minimum;
- Outside screw and yoke design using a standard adjustable stuffing box with bolts and gland flange for easy assessing and adjusting without special tools;
- Blow out proof stem as specified per the international standards (e.g. API 600/API 6D);
- API 598 ZERO Seat Leakage due to special lapping techniques of seat to ball.

We trust to have informed you herewith, however please contact the undersigned in case of any questions you may have.

With kind regards,
Hans Kurver
Marketing & Sales Manager
Rising Stem Ball Valves

Valbart srl

www.valbart.com

VALBART has been founded in 2003 under the name VELAN Italy.

Since then, the company has witnessed tremendous growth and has been recognized as the fastest growing firm in its sector. The important and highly ambitious decision of a management buy-out by the president, Mr. Roberto Bartolena and his team of executives led in 2008 to the acquisition of all the shares previously owned by VELAN Inc. and a change of name to VALBART Srl.
